

All Hazards Medical-Trauma Moulage Workshop July 20 - 21, 2017 9:00 am – 5:00 pm

WHO SHOULD ATTEND:

- EMS Educators
- Police/Fire
- Simulation Educators
- First Responders/Hospitals/EMS
- Public Health Emergency Preparedness Facilitators
- Educators/Trainers
- All Hazards/Safety Managers
- Nursing Coordinators

 - Moulage- A Collaboration of Experts Blog www.moulageconcepts.com
 - EMS World Magazine; "Wound of the Month" 2012 -Present
 - Carolina's Fire Rescue Magazine
 - Moulage Minute" 2014-2015
 - Medical Moulage- How to Make your Simulations Come Alive; 2011
- HSEEP Certification
- Simulation Consultant 2009-2012
- Simulation Technologist 2007-2009

Teaching/Facilitation

- MCI/All Hazards Workshop DHS, IN. 2017
- Active Shooter, Pre-Con., WEMSA, EMS World 2016, 2017
- Vital Signs EXPO featured presenter/ Trauma Moulage Workshop Syracuse NY, 2015
- EMS World EXPO featured presenter/ Trauma Moulage/Active Shooter Workshop 2016, 2015, 2014, 2013
- Trauma Moulage Workshop, featured presenter/Trauma Moulage Workshop NAEMSE, TN, 2015
- Medical Moulage Workshop, SEWNY Rochester NY, 2015
- Veteran/Custom Moulage Workshop VA Hospital OH. 2015, 2014
- Trauma Moulage Workshop Vital Signs, Syracuse NY 2015
- Medical Trauma Moulage Workshop SimGhosts; 2017, 2014, 2013, 2012, 2011

Memberships/Affiliations/Organizations

- Simulation Technician DACUM, Panel Member
- Simulation Technologies Specialist Advisory Board 2007-2011
- Northern California Simulation Advisory Board 2007-2009

The following interactive workshop is designed to enhance realism in simulation scenarios while providing best practice techniques. Moulage Concepts workshops provide structured scenario development and training realism - at all learner levels. Wound development includes

- scenario staging and techniques
- accessory moulage options
- wound care, reuse and storage recommendations
- time and money saving alternatives

"This course is superb! Bobbie's approach, knowledge, and expertise in teaching moulage is unparalleled. I do not believe I have taken a better course in my over 35 years of nursing. I learned more about moulage in this one day course than in all of the other courses I've taken combined. Kudos' to Moulage Concepts for excellence!"

Laurel Fountain-Beilfuss, RN, BSN Senior Associate, ICF, International Simulation Lab Coordinator

MOULAGE TECHNIQUES

- Create life-like, dimensional wounds that can be sutured, debrided and triaged for a realistic training experiences
- Create soft tissue wounds and accessory moulage utilizing Gels, Silifix & Waxes
- Use **SIM-Safe** make-up and industry techniques to create common medical-trauma, all hazards conditions and olfactory responses.

Bobbie's course was amazing. I would recommend that anyone needing or wanting to learn the art of moulage, whether for live actor patients or high fidelity manikins, should go through one of Bobbie's programs, or better yet bring her to your facility to teach. This training covers all aspects of medical education, from mass casualty, to pre hospital trauma to combat trauma. All educators dealing with simulation based medical education can learn something from one of Bobbie's courses. Highly skilled in her field Bobbie's teaching approach is by far the best I've encountered and it was a true pleasure to spend the day in her course!
